

# PIX- Accessory Products

## PIX-X'slit Belt Cutting Machine

Designed for cutting individual Timing Belts as well as V-Ribbed Belts from the sleeve.

**Product code:** TTMBCZZZZ000

**Price:** POA

## PIX-Belt Length Measure

Used for checking the length where size on the Belt is not clearly visible.

**Length Measure Conventional (100")**

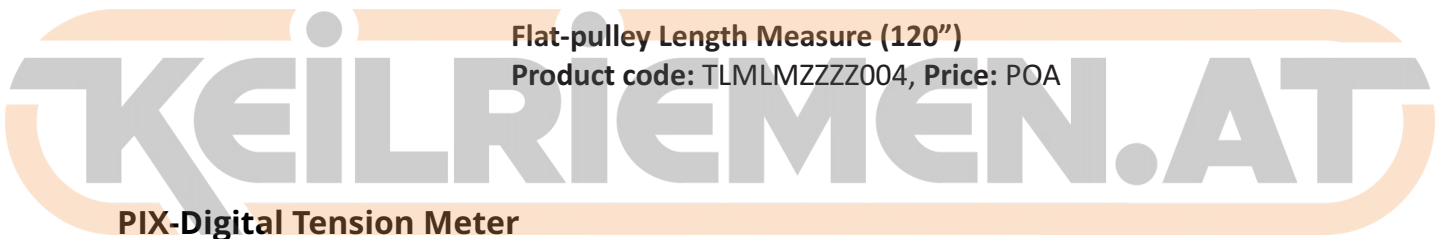

**Product code:** TLMLMZZZZ000, **Price:** POA

**Length Measure Conventional (120")**

**Product code:** TLMLMZZZZ001, **Price:** POA

**Flat-pulley Length Measure (120")**

**Product code:** TLMLMZZZZ004, **Price:** POA

## PIX-Digital Tension Meter

PIX Digital version of tension meter is used to correct the tension factor in a drive, thus helping the users' to attain the optimum Belt tension.

This equipment works on the frequency measurement phenomenon.

**Product code:** TTTMZZZZ002

**Price:** POA

## PIX-X'Align (Laser-guided Pulley Alignment Instrument)

Robust and highly effective maintenance tool, used to correct the misalignment of pulleys in a drive, to help the user to obtain the maximum service life of the Belt.

**Product code:** PPG07PWZZ060

**Price:** POA

# PIX- Accessory Products

## PIX-Service Kit

A composite tool kit comprising of vast range of equipment required in maintaining the drive.

The components are housed in a strong ABS outer case, which is light weight, portable and sturdy.

**Comprises of:** PIX-Digital tension meter, vernier calipers, angle gauge, pulley gauges, laser-guided pulley alignment tool, tension tester, measuring tape, torch, calculator, pen and user's guide.

**Product code:** APIPPAKZZ004

**Price:** POA

## PIX-Tension Tester (Analog)

Manual tool is meant for correcting or re-tensioning the drive with adequate reliability.

**Product code:** TTTTMZZZZ001

**Price:** POA

## PIX-Pulley Gauges

PIX Pulley Gauges are specially designed for checking the profiles of the grooves of various conventional and dual section pulleys.

**Product code:** TPUPUZZZZ002

**Price:** POA

## PIX Pulley Gauge for Banded V-Belt drives

The gauges are a valuable help for measuring grooves of multi-groove pulleys for banded-belt sections HA, HB, HC, HSPA, HSPB, HSPC, HAVX10 and HAVX13

**Product code:** TPUPUZZZZ008

**Price:** POA

## PIX-Pentagon (Poly-V Belt Wear Gauge)

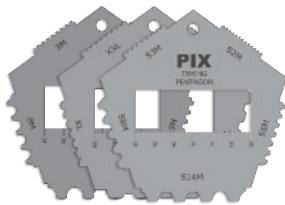

PIX-Pentagon is used as wear measurement gauge for Poly-V Belts. Wear in ribs, belt thickness and cracks can be identified using PIX-Pentagon.

**Product code:** TPUPUZZZZ005

**Price:** POA

# PIX- Accessory Products

## PIX-Pentagon (Timing Belt Gauges)

PIX-Timing Belt Pentagon gauges are specially designed for the inspection of Timing Belt profile.

**Product code:** TPUPUZZZZ006

**Price:** POA

## PIX-Belt Profile Gauge

Used for checking the Belt profile.

**Product code:** TPUPUZZZZ003

**Price:** POA
