

RUBBER WRAPPED BELTS

EXTRA, OLEOSTATIC, OLEOSTATIC GOLD

Wrapped V-belts are manufactured in polybutadiene compound. High variety of belt sizes available permits the application of Megadyne V-belts on all types of industrial equipments. Applied technology allows to reach so good dimensional precision in V-belts to make them suitable for multiple transmissions. This dimensional stability continues also during belt use.

MECHANICAL FEATURES:

- Smooth starting and running
- Wide range of driven speeds, using standard electric motors
- Low maintenance
- High efficient
- No need for lubrication
- Extremely wide horsepower ranges
- Dampen vibration between driver and driven pulleys
- Silent operations
- Long service life
- Easy installation
- Reduction in drive dimension

EXTRA

Extra belts were designed to offer durable and reliable performances on light and medium-duty drives. They represent an affordable solution for transmission systems of all industrial sectors.

OLEOSTATIC

Oleostatic rubber belts are developed with high resistant tensile elements, they are characterised by high performances, length stability during belts life, conductivity, oil and heat resistance. They are particularly suitable for centrifugal pumps, compressor, tool machines, generators, high power mills and stone mills.

OLEOSTATIC GOLD

Different materials and design features, together with an improved production process, have led to the development of a new class of higher rated wrapped V-belts. The Oleostatic Gold can operate in a wide range of industrial applications, within a large spread of load capacities and speeds - offering rated performance from 100 to 8.000 RPM and power capability from 1 to 400 kW, meanwhile granting large cost advantages for the end users.

MEGAMATCH ^{MEGA}MATCH

All Oleostatic and Extra V-belts carrying the MEGAMATCH logo are made and supplied according to the matching set tolerances and limits indicated by the relevant international standards.
